

EOH & Pervasant

Leading Board Pack solutions for a digitally progressive executive

The digital board pack movement has introduced efficiency within operations, keeping document management costs down while driving an environmental agenda in supporting paperless workplaces.

Electronic solutions for Board and Executive meeting documentation provide a facility where high level stakeholders may gain timely access to board papers, meeting notifications and agendas. The ability to electronically review, comment and utilise the platform during meetings means interactive engagement between colleagues is now secure and authentic.

EOH brings together the power of the Microsoft SharePoint platform, the ingenuity of the Pervasant Board Papers Solution and familiarity of the Apple iPad, or Windows operated personal desktop and notebook to deliver a superior experience for all users.

The benefits of the EOH solution include:

Time management – halve the time required to organise and deliver documents for board meetings

- Ease of use – the solution is book like in its functionality and offers an intuitive user experience
- Fast deployment with minimal configuration requirements

Authentic and secure access to all documentation

Easy to navigate, read and store large documents

- Built-in resolution voting and document signing tools

Full set of annotation tools

- Precise control over how board documents are presented
- Enhanced meeting experience

In-house or hosted SharePoint deployment

Secure environment from server to device

- Responsive fingertip experience
- Lower-cost alternative through Pervasant's one-time license fee for unlimited users
- Easy access anywhere in the world
- Improved collaboration and sharing of meeting minutes

Notifications of agenda and minutes updates so you never miss a thing

- Off-line functionality

Subscription options

- Scalable for use in many scenarios
- Adaptable to corporate CI

EOH: A MICROSOFT PARTNER

Enterprise Content Solutions

In the information and customer age, organisations like yours must obtain a platform powerful enough to meet your enterprise-wide requirements for document management, information management, workflow, reporting and process control.

We are a team of Microsoft SharePoint professionals with a passion for, and extensive knowledge of the Microsoft Technology suite. Using SharePoint as a platform we help you to capitalise on your software investment and develop industry leading solutions to optimise your business processes.

***Technology** makes it possible...
People make it happen.*

SharePoint was designed around the understanding that **business is about people, processes and technology**. Based on this principle and the capability of Microsoft technologies **EOH is best positioned to increase productivity and efficiency**, establish a culture of information sharing and collaboration, optimize business processes, reduce risk in terms of regulatory compliance, information theft and audit findings, consolidate information assets, enable Management Information and Business Intelligence capabilities and augment a flexible platform which forms the basis for **Smart Business Application development in a scalable, reliable and integrated manner**.

Contact us today and learn how our Enterprise Content Management team can assist you in getting the most out of your document management solution
